Utilizare VHDL

VHDL

V = Very high speed integrated circuit

HDL - Hardware Description Language

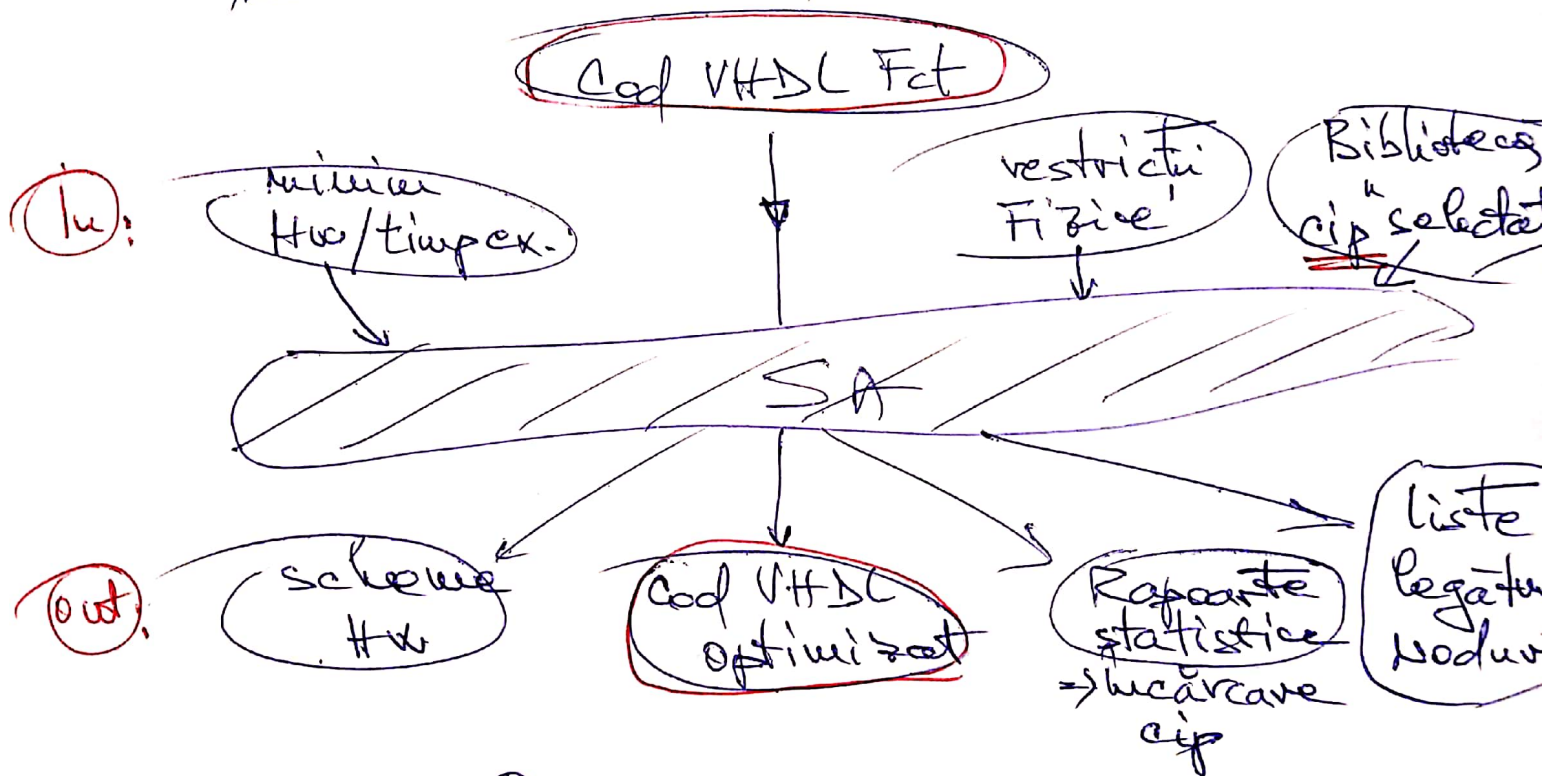

FPGA - Field Programmable Gate Array

ASIC - Application Specific Integrated Circuit

Simulator

- test funcționare logică pe PC
- set osciloscopice pt. variabile t : in, out, state
- Testare: compar poredi (in, out) < ideal rezultat
- acesc funcționarea
- scriu TB \Rightarrow stimuli (in) pt. circ.

Sinteza automată (SA)

Resurse f. puterice VHDL

- Simulator, Sinteza automată / sist. expert
- Proiectare Hw, Testare, Simulare → PC

<u>VHDL</u>	<ul style="list-style-type: none"> • limbaj nivel înalt, abstract, funcțional • modularizat, ('cărăușe' → blocuri → ...) • bibliotecă ↑
Hw	<ul style="list-style-type: none"> ⇒ Hw complex, fiabil, 1 cip, • timp proiectare, testare, realizare ↓↓
